# Discover a new way of riding

## COAST PERFORMANCE SADDLES

Buying a saddle is an investment, so choosing the right one is essential, not only for you, but also for your horse.

Our understanding of the complex biomechanical process of horse riding enables us to design, make and supply saddles which allows you to be in tune with your horse.

Discover what makes our saddles special and unlock your horses true potential.

## THE RANGE

ASTERION | COB DRESSAGE

ANDROMEDA | DRESSAGE

CARINA | GP

ORION | GPJ

ARIES | JUMP

### ERGONOMIC

Our unique and ergonomic design is based on biomechanical science helping you become a better rider

### DESIGN

Every saddle is designed and handmade here in the UK. Our specially sculpted seat provides all the support you need to maintain a correct riding position

### A HAPPIER HORSE

Coast Performance Saddles will help your horse be happier, perform better and last longer

“My horse has never gone so well, she is softer, lighter and really able to move”

Hayley & Lexi

[www.coastsaddles.co.uk](http://www.coastsaddles.co.uk)

## ERGONOMICS

Coast Performance Saddles are uniquely designed to be as horse-friendly as possible

Advancements in equine science and our understanding of the complex biomechanical process of horse riding has enabled us at Coast Performance Saddles to create a communication channel between horse and rider in the most ergonomically correct way possible.

### SHORT PANELS

All saddles are available with a compact panel ensuring the riders weight is carried on the strongest part of the horses back and that the delicate lumbar region or 'bucking button' is free from pressure and unrestricted.

### SHOULDER RELIEF

Not only does our leading edge panel design offer maximum spine, wither and trapezius clearance, it also incorporates an innovative shoulder relief feature ensuring maximum shoulder rotation, forearm extension and correct muscle development under saddle.

### MULTIPLE GIRTHING ARRANGEMENTS

Our GP, GPJ, and Jump saddles come with up to 4 separate girth straps to ensure optimum fit and stability while your horse is in motion.

Our dressage saddles while maintaining a sleek two girth strap appearance, incorporate a clever, swinging Y girthing and point system which provides maximum stability while maintaining a traditional and streamlined appearance.

### CLEARING NEGATIVE REFLEX POINTS

Wither clearance has always been a key aspect of saddle fit however science has revealed that clearance around and to the sides of the withers is just as important.

There are crucial 'pain points' or 'negative reflex points' which extend approximately 10cm down from the top of the withers and pressure on this area will cause the horse to hollow their back. Coast Performance Saddles have engineered a cutting edge panel to ensure this area is free from pressure while still maintaining stability.

### LARGE WEIGHT BEARING SURFACE

All of our saddles have a large weight bearing surface for maximum pressure distribution. More contact area equals less pressure per square inch.

## BALANCE

As soon as you 'the rider' sit on your horse, you cannot help but influence him. The question is; are you influencing your horse in a positive or negative way?

### CPS RIDER POSITIONING SYSTEM

Your Coast Performance Saddle will sit you further forward, in line with your horses centre of gravity enabling you to be truly 'with' your horse. This position will soften your seat, prevent slamming down on the horses back and help you to avoid falling in-front or behind the movement.

### SUPER SOFT SEAT

The super soft, English leather seat is extra soft to ensure maximum rider comfort.

Our specially sculpted seat will give you all the support you need to maintain a correct riding position.

### LONG THIGH LENGTH

Our 'Long Thigh Length' version comes with adjustable stirrup bars enabling you to fine tune your position. Perfect for riders who's hip to thigh measurement is more than 5cm longer than their knee to ankle measurement or those who struggle to get out of a 'chair seat' position with their heel in front of their hips.

Your Coast Performance Saddle will position you in a truly balanced 'Pilates' stance enabling you to develop an independent seat and be in full control of your weight.

Rider negatively affecting the horse.

Correct the riding style and position...

... and allow the horse to find his natural balance.

Coast Performance Saddles understand the complex horse, rider, saddle relationship and how small changes in fit and rider position can affect the horse.

As part of a whole horse approach, our saddles can help you achieve your goals, unlock your horses true potential and help to keep your horse stronger and sounder for longer.

Many saddles on the market sit the rider too far back in what we call 'the sink hole'.

Coast Performance Saddles will sit you further forward, in line with your horses centre of gravity enabling you to be truly 'with' your horse.

## OUR SADDLE RANGE

All saddles in the Coast Performance range have the following features as optional extras

### SEAT & KNEE

Nubuck not only looks great it also adds extra grip and security for the rider

### CANTLE

Customise your saddle with a show stopping cantle

### WELTING

Add subtle style with a selection of welting colours

### ASTERION | COB DRESSAGE

The Asterion Dressage for Cobs and Native Breeds Discover a new way of riding with this beautifully crafted dressage saddle specifically made with cob and native horses in mind.

The CPS Asterion will sit you further forward, in line with your horses centre of gravity enabling you to be truly 'with' your horse. This position will soften your seat, prevent slamming down on the horses back and help you to avoid falling in-front or behind the movement.

With all the features you would expect from a Coast Performance Saddle but with a flatter, wider tree with an open/hoop head yet narrow twist for rider comfort the Asterion will elevate your riding to the next level.

#### SPECIFICATION

**Size:** Available in sizes 14-18" (including half sizes)

**Colour:** ● ●

With your choice of cantle and welting colour (Please note the image featured shows a nubuck seat)

**Panel:** Standard Panel  
Compact Panel (for short backed horses)

**Tree type:** Cob and Native

**Cantle:** Round/Square

Comes with the 'Coast Performance Panel', unique CPS rider positioning system and shoulder relief as standard as well as Y girthing and point strap.

Asterion will elevate your riding to the next level.

### ANDROMEDA | DRESSAGE

The CPS Andromeda will bring another dimension to your flatwork. Not only is the Andromeda beautifully designed with a high cantle, deep seat and large external knee block it also incorporates the unique CPS rider positioning system which will sit the rider further forward and in balance with the horse without being trapped or restricted.

#### SPECIFICATION

**Size:** Available in sizes 14–19" (including half sizes)

**Colour:** ● ●

With your choice of cantle and welting colour (Please note the image featured shows gold welting)

**Panel:** Standard Panel  
Compact Panel (for short backed horses)

**Tree Style:** Standard Fit or High Wither

**Cantle:** Round

Comes with the 'Coast Performance Panel' and shoulder relief as standard as well as Y girthing and point strap.

### ORION | GPJ

The perfect blend between General Purpose and Jumps saddle the Orion GPJ has been specifically designed for those who enjoy flatwork and jumping. It also offers huge benefits for the taller rider on a shorter backed horse.

The forward cut flap allows room for the riders leg while the shoulder relief panel prevents the horses shoulder from being restricted.

Comes with the 'Coast Performance Panel', unique CPS rider positioning system and shoulder relief as standard as well as 4 girth straps for maximum stability.

#### SPECIFICATION

**Size:** Available in sizes 14–19" (including half sizes)

**Colour:** ● ●

**Panel:** Standard Panel  
Compact Panel (for short backed horses)

**Tree Type:** Standard, High Wither or Native

**Cantle:** Square

The Orion will soften your seat, prevent slamming down on the horses back.

### CARINA | GP

The Coast Performance General Purpose saddle is fantastic value for money. With the integrated performance panel, shoulder relief and unique CPS rider positioning system, this is a GP saddle like no other.

#### SPECIFICATION

**Size:** Available in sizes 14–19" (including half sizes)

**Colour:** ● ●

**Panel:** Standard Panel  
Compact Panel (for short backed horses)

**Tree Type:** Standard, High Wither or Native

**Cantle:** Round or Square

All GP saddles come with 4 girth straps as standard.

The Coast Performance General Purpose saddle is fantastic value for money.

### ARIES | JUMP

Unlike many jump saddles the CPS Aries is not only incredibly comfortable for the rider but also ensure optimum comfort and freedom for your horse. Designed specifically for the higher withered horse the Aries ensures generous wither and spinal clearance giving your horse has room to move and develop under saddle while maintaining stability and that close contact feel you love.

Our engineered panel and shoulder relief give your horse maximum freedom and allow full extension of the forearm and shoulder rotation.

#### SPECIFICATION

**Size:** Available in sizes 14–19" (including half sizes)

**Colour:** ● ●

**Panel:** Standard Panel  
Compact Panel (for short backed horses)

**Tree Style:** Standard Fit or High Wither

**Cantle:** Round or Square

Your horse is your friend, your partner and your responsibility. It is important to keep your horse happy, healthy and strong for as long as possible.
